

Installation Instructions Hinged Light System

Pole Base Installation:

1. Four 3/4" x 8" Anchor Bolts are to be previously installed on the 12.5 Bolt circle per supplied template.
2. Install one adjustment nut and flat washer to each anchor bolt. Top of flat washer should be approximately 1 1/4" from playing surface. Place base plate onto bolts. Bottom of base plate is to be 1 1/4" from playing surface, adjust nuts accordingly. Finish base plate installation by locking it into place by adding a washer and nut to each anchor bolt and tighten securely.
3. Lie bottom section of pole flat. Attach the light collar onto the 3" top pole, 12" from the bottom, then align the top pole with the bottom pole and slide it in till the light collar hits the top of the base pole.

Pole Top and Fixture Installation

4. Attach the T Bar or Single Light Fixture to the top of the extension pole and secure it with the bolt in the side of the extension pole
5. Have a licensed electrician snake the wire through the pole and connect the lights.
6. Raise the pole to vertical position and lock the plate in place with the two bolts and nuts securely so the pole doesn't rock.
